2016-01-12 Meeting notes

Date

▦ 12 Jan 2016 - last meeting with notes (2015-12-10)

Attendees

- Thomas Cherry
- Chris Durbin
- Christopher Gokey

Topics

- priority needed soon, nothing is fixed
- SERF
    - Stated, not finished, needs a priority setting from the top
- Delete API
    - GCMD has what it needs
    - https://cmr.sit.earthdata.nasa.gov/search/site/search_api_docs.html#retrieving-all-revisions-of-a-collection
- JSON
    - Still a couple of sprints/months away on the CMR side
- Location Keywords
    - need clarification on if the world fact book is to be the list
    - need wider talk
    - need to do this before development
- Indexing of all fields
    - no existing plans, now is a good time to suggest
    - need to specify which need to be included as a freetext or specific fields
    - indexing model is changing, months, will want to know which are needed now vs latter
- meta-metadata - updates to tags getting worked on next sprint, should include curtain use case
    - GCMD should review
    - 2-3 sprints of work
    - Updated Tagging Design
- Query by Parent
    - GCMD needs to writes something up on this
- Facet changes, design changes, have this started
    - Updated facet response
    - CMR has not finished or started this work
- If GCMD wants stats we should ask for "DSR Slides"
- When doing a freetext search by JSON query sort will change to sort by relevance score
    - Is the relevance score in the response? - Yes, it's called score
    - will be added soon, was not included due to a bug, will be fixed this week

Topics for next meeting

- 10.2 schema - no more issues?
- API parameter to give upper bound to updated_since call
- enumerations used by injest validation - continue conversation had before holidays
- api call reporting supported schemas - which version of DIF 10.x is supported - what are the related enumerations
- where can the public read the enumerations used in validations and in assignments from injest

Discussion Items

Time	Item	Who	Notes
			- Open talk

Action items

- [ ] GCMD to write up requirements for Parent Querie
- [ ] The group needs to talk about location keywords
- [ ] GCMD needs to give a prioritized list of new fields to index
- [ ] GCMD needs to review the tagging API soon
